New health insurance plan for Professionals - up to 70% less than traditional health insurance

WPA, a leading specialist health insurer has introduced Professional Health - a new private medical plan with highly preferential terms for Professionals recognised by WPA such as [Accountants](#) and their families.

With premiums up to 70% less than traditional comprehensive plans, Professional Health allows members of professions to tailor their level of cover to match individual requirements. Unlike many plans, Professional Health provides access to more than 650 hospitals in the UK – providing the freedom to choose timely quality treatment to suit individual needs.

WPA has pioneered the concept of Shared Responsibility. This offers low premiums, up to 70% less than traditional plans, without sacrificing the range of cover available. The costs can be further reduced by 10% if applications are made on line at wpa.org.uk/professional.

WPA has a world class reputation for the highest standards of customer service. In September 2003, WPA were again (for the eighth year in a row) voted number one in an annual NOP survey of customers views of leading health insurers.

For more information on Professional Health visit wpa.org.uk/professional for a list of WPA recognised professions and to gain a quote.

WPA - Treating professionals as professionals.
